mihirdudhatra3906@gmail.com ✦ [linkedin.com/in/mihir-dudhatra](https://www.linkedin.com/in/mihir-dudhatra) ✦

OBJECTIVE

Technical Engineer with hands-on experience in Python development, PostgreSQL/SQL optimization, and Agentic AI workflows (LangGraph, CrewAI). Skilled in designing backend microservices, complex relational schemas, and LLM-orchestrated automation pipelines. Seeking to apply strong debugging, database architecture, and AI governance-aligned engineering practices in a full-time software development role.

EDUCATION

B.Tech in Electronics and Telecommunication Engineering

Honors in Artificial Intelligence & Machine Learning

SVKM's Dwarkadas J. Sanghvi College of Engineering — CGPA: 8.345

2020 – 2024

HSC (12th) — 71.85%

2020

SSC (10th) — 84.80%

2018

SKILLS

Languages:	Python, SQL, Java, JavaScript
Backend Frameworks:	FastAPI, Flask, Django, RESTful APIs, async programming
Databases:	PostgreSQL (complex SQL, CTEs, indexing, query optimization), MySQL
Agentic AI:	LangGraph, CrewAI, LangChain, LLM API integration, prompt engineering, RAG workflows
AI/ML:	Generative AI, NLP, Whisper STT, embeddings, PyTorch (Basic), TensorFlow (Basic)
Software Engineering:	SDLC, Agile methodology, code reviews, unit testing, debugging & benchmarking
DevOps & Tools:	Docker, Git, GitHub, GitLab, CI/CD pipelines, VS Code
Cloud:	AWS (EC2, S3, Lambda)
Documentation:	Technical documentation, system architecture diagrams, relational schema design
Soft Skills:	Stakeholder communication, analytical troubleshooting, remote collaboration

EXPERIENCE

Associate Software Developer

Sept 2024 – Present

YourDataConnect

Remote

- Designed, developed, and maintained backend microservices in **Python**, following SDLC and Agile practices.
- Architected **PostgreSQL** schemas and wrote complex SQL queries, CTEs, views, and indexes to optimize data access and performance.
- Built autonomous LLM orchestration workflows using **Agentic AI frameworks** (CrewAI, LangGraph-style patterns, OpenAI APIs) to automate data-processing pipelines.
- Implemented **RAG workflows** for context-aware retrieval, improving output accuracy across AI-driven tooling.
- Debugged and benchmarked production systems, resolving structural logic bottlenecks and performance regressions.
- Participated in code reviews and authored technical documentation, including schema diagrams and logic flowcharts.
- Collaborated with cross-functional stakeholders to translate platform performance issues into technical solutions.

Web Developer Intern

June 2023 – Aug 2023

Viral Inbound

Mumbai, Maharashtra

- Developed high-performance websites using WordPress, Shopify, and Webflow.
- Built automated content pipelines and improved SEO, responsiveness, and performance.

Web Developer Intern

July 2022 – Aug 2022

Goldenmace IT Solutions

Navsari, Gujarat

- Built responsive and dynamic web pages with HTML, CSS, and JavaScript.
- Collaborated using Git/GitLab for version control, code reviews, and deployment practices.
